Sardar Patel Institute of Technology (SPIT)

Attendance Policy (2026-27)

SYNTHETIC - FOR RESEARCH AND TESTING ONLY

Document control	Details
Document ID	SPIT-ACA-ATT-2026-27-001
Issuing department	Office of the Dean (Academics) - Attendance and Timetable Cell
Publication date	01 July 2026
Effective date	15 July 2026
Version	1.0
Status	Active for Academic Year 2026-27, subject to later amendments
Supersedes / relationship	SPIT-ACA-ATT-2024-25-001 (historical policy; no longer operative for 2026-27)
Institution / academic year	Sardar Patel Institute of Technology (SPIT) | 2026-27

Purpose. This policy establishes the method for recording, calculating, reviewing and enforcing attendance for students enrolled in regular academic programmes during Academic Year 2026-27.

Research-use notice. All authorities, dates, thresholds, fees, timelines and procedures in this document are invented for a synthetic research corpus. They must not be relied on for real academic, legal, financial or administrative decisions.

10. Version control and precedence

1. Authority, purpose and applicability

This synthetic policy is issued by the Office of the Dean (Academics) for the purpose of a controlled college-information chatbot research corpus. It is not an actual SPIT notification and creates no real institutional rights or obligations.

The policy applies to students enrolled in full-time undergraduate and postgraduate programmes administered by the Academic Office during Academic Year 2026-27. It covers lectures, tutorials, studios, laboratories, workshops, clinical or field sessions where included in the approved curriculum, and other timetabled instructional activities. Research scholars, visiting students, continuing-education participants and students

governed by a separately notified programme handbook are outside its scope unless that handbook expressly adopts this policy.

The policy is to be read with SPIT-ACA-CND-2026-27-001, Attendance Condonation Rules, and SPIT-EXM-REG-2026-27-001, Examination Registration Guidelines. A later circular may amend a specified clause without replacing the entire policy. For 2026-27, SPIT-ACA-CIR-2026-27-003 takes precedence only on the matters it expressly revises.

2. Definitions

Term	Meaning
Academic period	A scheduled lecture, tutorial, studio or other instructional unit recorded separately in the timetable and attendance system.
Practical session	A scheduled laboratory, studio, workshop, field, clinical or other supervised hands-on component identified as practical in the approved course structure.
Held session	A scheduled instructional session that actually took place, including an approved rescheduled session.
Cancelled session	A session formally cancelled by the department and not replaced. It is excluded from the attendance denominator.
Raw attendance	Attendance calculated from sessions marked present, absent or otherwise validated before a condonation decision.
Deemed attendance credit	A specific attendance credit granted under the Revised Attendance Circular for eligible, pre-approved institutional duty.
Condonation	A discretionary eligibility adjustment under the separate Attendance Condonation Rules. It does not rewrite the raw attendance register.
Course component	A separately assessed or tracked part of a course, such as theory or practical.

Unless a course outline states otherwise, one attendance entry is made for each scheduled instructional period. A practical block is recorded as one practical session, regardless of whether it spans one or more consecutive timetable periods. Departments must use the component labels approved in the course registration record.

3. Minimum attendance requirements

A student must meet the applicable minimum separately in each registered course and, where relevant, in each separately tracked course component. Attendance in one course cannot be transferred to another course, and surplus theory attendance cannot compensate for a practical shortfall.

Course/component type	Minimum attendance	Eligibility test
Theory-only course	75%	At least 75% of held theory periods must be attended or carry a valid deemed-attendance credit.
Practical-only course	80%	At least 80% of held practical sessions must be attended or carry a valid deemed-attendance credit.

Course/component type	Minimum attendance	Eligibility test
Course with theory and practical components	Theory: 75%; Practical: 80%	Both component thresholds must be satisfied independently. The course-wide combined percentage cannot substitute for either component test.
Field / studio component	As classified in the approved course structure	The Academic Office must classify the component as theory or practical before the semester begins.

The percentage is calculated as eligible attended units divided by held units, multiplied by 100. The system stores the underlying numerator and denominator. Displayed percentages may be shown to two decimal places, but eligibility is determined from the unrounded fraction. A displayed 74.99% does not meet a 75% requirement, and a displayed 79.99% does not meet an 80% requirement.

A student must satisfy the requirement in every applicable course component to be marked attendance-eligible for that course. A course with no practical component has no practical threshold. A course with no theory component has no theory threshold.

4. Calculation rules and excluded sessions

The attendance denominator includes all held instructional periods or sessions assigned to the student in the approved timetable for the relevant course and component. The numerator includes sessions recorded as present and any valid deemed-attendance credits entered under the Revised Attendance Circular.

The following are excluded from the denominator: institute holidays; formally cancelled sessions that are not replaced; timetable periods designated as self-study or non-contact time; and sessions scheduled before a student’s effective course-registration date or after an approved course-withdrawal date. If a cancelled session is replaced, the replacement is counted once on the date it is held.

A student who arrives after the instructor has closed attendance may be recorded absent for that session. A department may correct a verified data-entry error, but it must not create partial attendance unless the approved course structure expressly provides for separate attendance units. Leaving a session early without instructor approval does not convert an absence into presence.

Attendance is course-specific. A student attending a guest lecture, seminar, placement activity, club meeting or event outside the approved course timetable receives no course attendance merely by participating. The only exception relevant to institutional events is the limited deemed-attendance process in SPIT-ACA-CIR-2026-27-003.

5. Recording and responsibilities

Role	Responsibility
Course instructor	Record attendance against the official timetable; submit the record within 48 hours of the session; retain contemporaneous supporting records for corrections.
Course coordinator	Check component mapping, timetable changes and missing entries; resolve routine discrepancies with the instructor.
Department attendance coordinator	Publish the monthly course-level statement; verify correction requests; maintain an audit trail.
Student	Review attendance regularly; report a discrepancy within the applicable review period; retain evidence for any application.

Role	Responsibility
Academic advisor	Explain the applicable threshold and route; review unusual patterns; refer cases to the department.
Head of Department (HoD)	Certify departmental records and recommendations; prevent unauthorised manual changes.
Attendance and Timetable Cell	Administer the central attendance system, apply approved correction decisions and maintain version-controlled records.

The institute-designated attendance portal is the system of record. If the portal is unavailable, the instructor must use the approved offline register and upload the entries when service is restored. An offline record must identify the course, date, session, instructor and student status. A photograph or informal message alone is not a substitute for an authenticated departmental record.

Instructors should submit entries within 48 hours. The department should publish a monthly statement within five working days after the month closes. A delay in publication does not automatically convert an absence into attendance.

6. Absence, leave and institutional activities

A student who is unable to attend remains responsible for the attendance consequences of the missed session unless a specific credit or condonation is approved under the applicable rule. Prior leave approval, a medical certificate, participation in an outside event or a family commitment does not by itself mark a student present.

Medical or personal leave is considered only through the Attendance Condonation Rules. The student must submit the specified evidence and meet the application deadline. Approval is discretionary and is not automatic merely because a document has been submitted.

For the baseline rule, an approved institutional duty that overlaps a scheduled class is recorded as absent and may be considered through condonation; it is not automatically treated as present. This sentence is amended from 01 January 2027 for qualifying duty under SPIT-ACA-CIR-2026-27-003. The circular grants limited deemed attendance credit for eligible institutional duty and controls over this baseline sentence to the extent of the conflict.

Non-approved activity, informal volunteer work, external employment, private competitions and events without a written institutional duty authorisation remain ordinary absences. No retroactive institutional-duty credit may be inferred from a participation certificate alone.

7. Attendance monitoring and student review

Students should review the portal at least once every two weeks and after any timetable change. The portal should show course, component, held units, present units, approved credits, percentage and last update date. Students should not rely solely on an informal spreadsheet or an instructor’s verbal estimate.

Under the original Section 7.3 rule, a student must submit a discrepancy request within five working days after the monthly attendance statement is published. The request must identify the course, date, session and claimed error, and attach available supporting material. This review period is extended to seven working days for monthly statements issued on or after 01 January 2027 by SPIT-ACA-CIR-2026-27-003. Statements issued before that date retain the five-working-day period, unless the period was still open on 01 January 2027; in that case the student receives the longer of the remaining time or seven working days from publication.

The department should acknowledge a complete request within two working days and issue a reasoned decision within five working days. A correction is entered only after instructor and department verification. The portal must preserve the original entry, correction value, approver, reason and timestamp in the audit log.

8. Shortage, condonation and examination eligibility

A student below the minimum threshold may apply only where the shortfall falls within the ranges and circumstances defined by SPIT-ACA-CND-2026-27-001. Condonation is not a general waiver and is not available for a component below the non-condonable floor. The condonation rules govern documentation, deadlines, committee review, adjustment limits and appeal.

At the end of the teaching period, the department prepares a course-wise attendance eligibility statement. The Controller of Examinations uses the approved statement, including any final corrections, deemed credits and condonation decisions, when preparing the examination eligibility list. Examination registration procedures and dates are contained in SPIT-EXM-REG-2026-27-001.

Registration or payment of an examination fee does not cure an attendance shortage. A student may be eligible in some courses and ineligible in others. Where permitted by the examination system, the student may register for eligible courses while a separate course remains withheld.

9. Records, audit and enforcement

Attendance records, correction decisions and condonation outcomes are retained for at least three academic years after the relevant semester closes, or longer if required for an active review. Access is role-based. Students may view their own records; instructors may view assigned courses; department coordinators may view their department; central administrators may access records for audit and examination processing.

Any attempt to falsify attendance, alter a register without authority, submit fabricated evidence or obtain another person’s credentials may be referred under the institute’s synthetic student conduct process. A verified error must be corrected transparently; a suspected manipulation must not be silently overwritten.

The Dean (Academics) is the policy owner. The Attendance and Timetable Cell may issue operational instructions consistent with this policy. No department may lower the minimum threshold or create a local condonation category without a formally approved amendment.

10. Version control and precedence

This is Version 1.0, effective 15 July 2026. It supersedes SPIT-ACA-ATT-2024-25-001 for Academic Year 2026-27. The 2024-25 document remains available only as a historical record and must not be applied to 2026-27 attendance decisions.

SPIT-ACA-CIR-2026-27-003, published 15 December 2026 and effective 01 January 2027, amends the institutional-duty treatment in Section 6 and the review period in Section 7. All other provisions remain unchanged. Where the circular and this policy conflict on those two subjects, the circular controls from its effective date.

Appendix A. Worked calculation examples

Example	Calculation	Outcome
Theory course	42 attended / 56 held = 75.00%	Meets the theory minimum.
Theory course	41 attended / 56 held = 73.21%	Below the minimum; may be considered only if condonation rules are met.
Practical component	16 attended / 20 held = 80.00%	Meets the practical minimum.
Practical component	15 attended / 20 held = 75.00%	Below the practical minimum; assess under the practical condonation range.
Cancelled class	A class is formally cancelled and not replaced.	Exclude it from the denominator.
Approved duty after 01 Jan 2027	One qualifying duty credit is applied to a scheduled theory period.	Count the credit in the numerator after authorisation under the circular.

Appendix B. Related synthetic records

Document ID	Title	Relationship
SPIT-ACA-ATT-2024-25-001	Attendance Policy (2024-25) - Old Version	Superseded predecessor; historical comparison only.
SPIT-ACA-CND-2026-27-001	Attendance Condonation Rules	Defines exceptions and adjustment process.
SPIT-EXM-REG-2026-27-001	Examination Registration Guidelines	Defines exam form windows and use of attendance eligibility.
SPIT-ACA-CIR-2026-27-003	Revised Attendance Circular (2026-27)	Amends two specified provisions from 01 Jan 2027.
